X7

CHARACTERISTICS

6 piano key-like thick-walled taillights and integrated taillight design typical of luxury cars make the model easy to identify and highlight technology and fashion, Comparable to high-performance sport car with optimized air currents, Hidden external doorknobs with the same shape as Tesla MODEL S are adopted in BEIJING-X7.

1958

BAIC produced the first sedan of China: "Jinggangshan" Sedan

1961

BAIC developed the first light off-road vehicle of China, and BJ210/212 had been China's most popular model for three decades.

1966

BAIC developed the light truck BJ130 and became the largest producer of light trucks in 1975

1984

Beijing JEEP
The first Sino-foreign joint venture of China's automotive industry and achieved the historical inheritance of off-road vehicle

1996

FOTON
Dual development of passenger car and commercial vehicle

2002

Beijing Hyundai
was established and its production and sales volume exceeds one million per year.

2005

Beijing Benz Automotive Co., Ltd. was established and it has built the world's largest and most comprehensive passenger vehicle manufacturing base of Mercedes-Benz

2009

Purchasing SAAB to absorb overseas advanced standard to enhance self-owned brand development.

2010

Full-scale acceleration of self-developed products.

2012

Self-developed series
SENOVA was established.

2013

Become one of the Fortune Global 500 for the first time. The launch of EV150, BAIC's first electric vehicle, technological change from gasoline car to electric car.

2015

X25 the launch of BAIC's first SUV product

2017

Ranked 137th in the Fortune Global 500 BJ80 used again as the president's vehicle at the military parade to mark the 90th Anniversary of PLA.

2018

60th Anniversary of BAIC.

2019

Baic Group's turnover exceeded 500 billion yuan.

INTERIOR

An opening area of 0.59, 4mm-thick privacy tempered glass, a static load of 800N, smart anti-pinch function, opening or closing the sunroof via voice, keys or remote control, automatic closing function in rainy days, rear seats can be laid almost flat after moving the cushions forward. As a result, the trunk is connected to the rear seat space, forming an even space (almost 180 °) and making it easy to place bulky items. As there is no raised part in the middle of the floor, the passenger in the middle of the rear seats will enjoy much greater comfort. A leading wheel base of 2,800mm, offering driving and riding experience never enabled by other models of the class

TECHNOLOGY

Three linked screens, entertainment exclusive to the front passenger, The two-way switch, which can be touched or pressed, is precise and revolutionary with proper key stroke, 9 ways of opening, no need to look for keys, inductive opening, anti-pinch design, high, medium, low and self-defined heights

SAFETY

Four megapixel cameras are used to collect the images around the car, and provide reverse images and trajectories to enable precise parking. Integrated Adapted Cruise Control (IACC) Lane Deviation Warning (LDW), Lane Keeping Assist (LKA), Automatic Emergent Braking (AEB-P) , High Beam Assist (HMA), Traffic Sign Recognition (TSR), Press one key to park X7,

SAFETY GUARANTEE

LDW LANE DEPARTURE WARNING

The system identifies the marker lines of the lane where the car is running through the front-view camera, and calculates the car's location relative to the lane. When the driver is unaware of diverging from the lane, the system will give an alert to remind the driver of that.

TSR TRAFFIC SIGN RECOGNITION (TSR)

The system captures the speed limit signs on roads and displays the information on the instrument.

DOOR OPENING WARNING (DOW)

The moving objects on both sides of the car will be detected when the door is opened after the car reaches the destination. If an objective approaches, the yellow warning light on the external rearview mirror will flash; if the door is still opened, the car will give a sound alert, which will not stop until the risk is eliminated to ensure safe door opening.

DYNAMIC IDENTIFICATION OF LOW-SPEED OBJECTS

Objects moving at a low speed within 10 m of the car can be effectively identified; both the buzzer and the UI of the infotainment system will warn the driver against accidents (when the speed is lower than 10 km/h).

AUTOMATIC WINDOW CLOSING IN RAINY DAYS

When car windows are not closed while the car engine is stopped and four doors are closed, if the system detects it's raining or it's going to rain in 24 hours, both the windows and skylight will be closed automatically to protect the objects inside the car from being damaged.

BOSCH SYSTEM

The blinking frequency and head turning angle of the driver are monitored through the camera in the car, which monitors the driver's state all the time and gives image and harsh sound alerts when the driver is in not in a good state.

X7 SPECIFICATION 1.5T 7DCT

Model	COMFORT	LUXURY	PREMIUM
